DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 17 September 2008 has been entered.

Election/Restrictions

2. Applicant's election of Species I, claims 4-6 and 11, in the reply filed on 15 January 2009 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 7-10 and 12-13 are withdrawn as being directed to non-elected invention.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 11 recites the limitation "the photodiodes" in line 2 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 4, 6 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Cornely et al. (U.S. Patent 3,319,080).

Regarding claim 4, Cornely et al. discloses in FIG. 6 a circuit comprising photodiode 68, resistor 58, and a tunnel diode 60. Cornely et al. teaches in col. 3, line 74 the switching of the tunnel diode. Cornely et al. also teaches in the title that it is a digital system.

Regarding claim 6, Cornely et al. teaches in FIG. 5 the electrical signal of the tunnel diode.

Regarding claim 11, Cornely et al. teaches that photodiodes 68 and 70 are connected in series.

Claim Rejections - 35 USC § 103

8. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

9. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cornely et al. (U.S. Patent 3,319,080) in view of Valley et al. (U.S. Patent 6,466,349 B1).

Cornely et al. has been discussed above in regard to claims 4, 6 and 11. The difference between Cornely et al. and the claimed invention is that Cornely et al. uses direct modulation for controlling the output of laser diode 61. Valley et al. et al. teaches in FIG. 2 a modulator for modulating the output light to fiber 60. Valley et al. et al. teaches in col. 1, line 17-27 the

shortage of direct modulation. One of ordinary skill in the art would have been motivated to combine the teaching of Valley et al. et al. with the circuit of Cornely et al. because external modulation supports higher data rates than direct modulation. Thus it would have been obvious to one of ordinary skill in the art at the time the invention was made to use external modulation, as taught by Valley et al. et al., in the circuit of Cornely et al. because external modulation supports higher data rates than direct modulation.

Response to Arguments

10. Applicant's arguments with respect to claims 4-6 and 11 have been considered but are moot in view of the new ground(s) of rejection.
